## 4C-Francesca Cianficconi Luxury Yacht Charter & Superyacht News

[4C-Francesca Cianficconi Brief](#)

### [Two newly launched Columbus Superyachts designed by Hydro Tec-Sergio Cutolo](#)

May 22, 2015

On Saturday, May 16, 2015, the Naples-based shipyard, Palumbo Group, successfully launched two all-new Columbus vessels: the second hull of Columbus 40 Sport Hybrid yacht with lovely interiors designed by Hot Lab, as well as the all-new Columbus 57m Classic yacht with interior design by 4C-Francesca Cianficconi. Both vessels feature hydrodynamics, engineering and exterior design by Hydro Tec-Sergio Cutolo.

Launch of second Columbus 40 Sport Hybrid Yacht and 57m Classic superyacht, both designed by Hydro Tec-Sergio Cutolo

Columbus 40 Sport Hybrid motor yacht Hull no. 2 follows a great success of her sister ship, the [first Columbus 40 Sport Hybrid superyacht](#), officially unveiled in 2013. Since then, she has received many international awards for her interior and exterior design, as well as her low environmental impact. The vessel boasts the hybrid propulsion system, combined with the highly efficient hydrodynamic characteristics, ensuring a particularly low fuel consumption.

New Columbus 57m Classic superyacht is a beautiful displacement vessel, representing a real challenge for the design and engineering studio lead by Sergio Cutolo. The owner requested many solutions not easily integrated on a vessel measuring 57 meters in length, such as five enclosed decks plus a huge sundeck. The studio has developed solutions where the design and technical aspects could work hand in hand.

Superyacht Darwin 107', luxury yacht Darwin 102' and Darwin 86' yacht by CdM and Hydro Tec-Sergio Cutolo

Following the launch of two Columbus yachts, the year 2015 will mark the launch of three other important vessels, bearing the Hydro Tec signature. These include the [Darwin 107' superyacht](#), the Darwin 102' yacht, as well as [luxury yacht Darwin 86'](#), all under construction at [Cantiere delle Marche](#) and with interior design by [Studio Design PFA](#). Moreover, Hydro Tec is currently working with [Cantiere delle Marche](#) on the second unit of the Darwin 102', the naval architecture and engineering for the Nauta Air 108', as well as the upcoming Nauta Air 111'.

Hydro Tec has also embarked on the design of the new [M40 Explorer yacht](#) for [Mondomarine](#), which has already seen the cutting of the first plate. The vessel features the exterior design, marine engineering and naval architecture by Hydro Tec, while the interior design is by [Fossati Design Bureau](#).

Sergio Cutolo

2015 is an important year for Hydro Tec. This year marks not only the amazing professional results of the studio, but also its 20<sup>th</sup> anniversary to be celebrated in July by a new website and a commemorative brochure to contain the many yacht projects the studio has worked on so far.

A nice selection of luxury charter yachts with design by [Hydro Tec-Sergio Cutolo](#) can be found here below.
